Oracle customers that have purchased support have access to electronic support through My Oracle Support. For information, visit <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=info> or visit <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=trs> if you are hearing impaired.

Sample Code

Oracle may provide sample code in SuiteAnswers, the Help Center, User Guides, or elsewhere through help links. All such sample code is provided "as is" and "as available", for use only with an authorized NetSuite Service account, and is made available as a SuiteCloud Technology subject to the SuiteCloud Terms of Service at www.netsuite.com/tos.

Oracle may modify or remove sample code at any time without notice.

No Excessive Use of the Service

As the Service is a multi-tenant service offering on shared databases, Customer may not use the Service in excess of limits or thresholds that Oracle considers commercially reasonable for the Service. If Oracle reasonably concludes that a Customer's use is excessive and/or will cause immediate or ongoing performance issues for one or more of Oracle's other customers, Oracle may slow down or throttle Customer's excess use until such time that Customer's use stays within reasonable limits. If Customer's particular usage pattern requires a higher limit or threshold, then the Customer should procure a subscription to the Service that accommodates a higher limit and/or threshold that more effectively aligns with the Customer's actual usage pattern.

Beta Features

Oracle may make available to Customer certain features that are labeled "beta" that are not yet generally available. To use such features, Customer acknowledges and agrees that such beta features are subject to the terms and conditions accepted by Customer upon activation of the feature, or in the absence of such terms, subject to the limitations for the feature described in the User Guide and as follows: The beta feature is a prototype or beta version only and is not error or bug free and Customer agrees that it will use the beta feature carefully and will not use it in any way which might result in any loss, corruption or unauthorized access of or to its or any third party's property or information. Customer must promptly report to Oracle any defects, errors or other problems in beta features to support@netsuite.com or other designated contact for the specific beta feature. Oracle cannot guarantee the continued availability of such beta features and may substantially modify or cease providing such beta features without entitling Customer to any refund, credit, or other compensation. Oracle makes no representations or warranties regarding functionality or use of beta features and Oracle shall have no liability for any lost data, incomplete data, re-run time, inaccurate input, work delay, lost profits or adverse effect on the performance of the Service resulting from the use of beta features. Oracle's standard service levels, warranties and related commitments regarding the Service shall not apply to beta features and they may not be fully supported by Oracle's customer support. These limitations and exclusions shall apply until the date that Oracle at its sole option makes a beta feature generally available to its customers and partners as part of the Service without a "beta" label.

SuiteApps

SuiteApps are applications that extend NetSuite for specific industry and business needs. A SuiteApp is a bundle or collection of bundles that can be developed by NetSuite, or by members of the SuiteCloud Developer Network (SDN), NetSuite's third-party developer program. NetSuite customers also can develop their own SuiteApps to meet their specialized requirements, or engage Professional Services to do so.

For information about SuiteApps developed and supported by SDN Partners and other third parties, see [Third Party SuiteApps \(not provided by Oracle\)](#).

For information about SuiteApps built, distributed, and supported by NetSuite, see [NetSuite SuiteApps](#).

NetSuite SuiteApps

NetSuite SuiteApps are developed on the SuiteCloud platform, and are distributed and supported by NetSuite. Your company may also have custom SuiteApps developed and distributed through paid Professional Services engagements. To check the SuiteApps installed in your account, see the help topic [Reviewing the Installed Bundles List](#). On the Installed Bundles page, the Owner column shows the name of the SuiteApp developer.

Note: NetSuite SuiteApps are generally available for installation. For details about limitations that may apply to a specific SuiteApp, click the link in the Description column. Some SuiteApps are available only to accounts designated by NetSuite. In some cases, extra fees may be required. If you are interested in getting access to a shared SuiteApp, contact your NetSuite account representative.

List of NetSuite SuiteApps

The following table includes only those SuiteApps developed and supported by the NetSuite Platform Solutions Group.

Note: To view the latest release notes for these SuiteApps, see the help topics [SuiteApps \(Bundles\) Released by NetSuite](#) and [SuiteCommerce Release Notes](#).

Name	ID	Description	How to Install the SuiteApp
Advanced Electronic Bank Payments (formerly called NetSuite Electronic Payments for OneWorld)	21147	<p>Enables creation of payment files to process payments for vendors, employees, and customers (refund), and also receive payments from customers anywhere in the world. Using the SuiteApp, companies operating in multiple countries can create payment files to pay domestic vendors in local currency, and international vendors in foreign currency. The SuiteApp also enables:</p> <ul style="list-style-type: none"> Automated payment batch creation Custom payment file template support SuiteCloud Plus support <p>See the help topic Electronic Bank Payments.</p>	See the help topic Setting Up Electronic Bank Payments .
Advanced Manufacturing	120119	<p>Extends your NetSuite manufacturing routing into the Advanced Manufacturing Work Bench enabling manufacturers to define work instructions, associate material usage, compare</p>	See the help topic Configuring Advanced Manufacturing Prerequisites .

Name	ID	Description	How to Install the SuiteApp
		resource supply with demand, and establish planned start and end times. To learn more, see the help topic Advanced Manufacturing	
Advanced Procurement	57060	Enables reference approval routing workflows for requisitions, purchase contracts, and blanket purchase orders. Also contains the Procurement Dashboard. See the topics: <ul style="list-style-type: none"> ■ Requisition Approval Workflow ■ Blanket Purchase Order Approval Workflow ■ Purchase Contract Approval Workflow ■ Procurement Dashboard 	See the topics: <ul style="list-style-type: none"> ■ Installing the Requisition Approval Workflow. ■ Installing the Blanket Purchase Order Approval Workflow ■ Installing the Purchase Contract Approval Workflow ■ Installing the Procurement Dashboard
Advanced Promotions	31356	Provides the ability to create complex promotional discounts based on items and order amounts, as well as “buy X, get Y” discounts. See the help topic Creating Advanced Promotions .	See the help topic Installing Advanced Promotions .
Advanced Revenue Recognition	92373	Enables reference approval routing workflow for revenue arrangements used in Advanced Revenue Management. See the help topic Revenue Recognition Approval Workflow .	See the help topic Installing the Advanced Revenue Recognition SuiteApp .
Affordable Care Act (ACA) Reporting	147355	Set up and track the health coverage offered to full-time employees, and electronically file the required health care coverage forms (1094-C and 1095-C) to the Internal Revenue Service (IRS).	See the help topic Installing the ACA Reporting SuiteApp .
Application Performance Management	67350	Helps you to observe and manage performance of NetSuite customizations and business critical operations, through performance dashboard, data visualizations, page time summary, and script analysis features. EITF-08-01 Platform Feature	29321	Allows tracking and setting of multiple Estimated Selling Prices (VSOE prices) on transaction lines affected by EITF-08-01. See the help topic EITF 08-01 Revenue Recognition Feature .	See the help topic About Installing EITF 08-01 Revenue Recognition .
Electronic Bank Payments (formerly called NetSuite Electronic Payments)	155094	Enables creation of payment files to process local payments for vendors, employees, and customers (refund), and also receive payments from local customers. Using the SuiteApp, companies operating within a single country using a single currency, can create payment files for domestic payments in local currency.	See the help topic Setting Up Electronic Bank Payments .

Name	ID	Description	How to Install the SuiteApp
		The SuiteApp is freely available for download by all customers and provides payment capabilities for local banks in your geography. See the help topic Electronic Bank Payments .	
Electronic Invoicing	116076	Enables you to create electronic documents (e-documents) to help you comply with legal requirements in your country or to automate your order to cash process.	See the help topic Installing and Setting Up Electronic Invoicing .
Employee Directory and Org Browser	112469	Enables your employees to quickly and easily search for their colleagues by name, location, department, and job title. If you use NetSuite OneWorld, employees can also search by subsidiary. This SuiteApp also provides an Org Browser that your employees can use to quickly browse through the organizational chart for your company, viewing the supervisors and direct reports of fellow employees.	See the help topic Setting Up the Employee Directory SuiteApp .
Employee Reports	167330	Enables you to access employee reports that are available as NetSuite saved searches. When customized, the saved searches can be accessed from a unique Reports menu location.	See the help topic Employee Saved Search Reports .
Enhanced Sales Center	19656	Provides a simpler and more familiar sales user experience. Tabs, dashboards, search and entry forms are customized to help users navigate, search, and enter data with more ease and speed. See the help topic The Enhanced Sales Center SuiteApp .	See the help topic Setting up the Enhanced Sales Center .
File Drag and Drop Beta	41309	Provides the ability to drag and drop single or multiple files from the desktop to a record page in edit mode, or to editable sublists of supported records. See the help topic Uploading Files Using File Drag and Drop .	See the help topic Installing File Drag and Drop
Fixed Assets Management	223173	Allows small and medium-sized businesses to maintain and control all aspects of their fixed assets, from depreciation through maintenance schedules and insurance. See the help topic Fixed Assets Management Overview .	See the help topic Installing the Fixed Assets Management SuiteApp .
Grid Order Management	41296	Provides the ability to use a grid format for entering and printing orders for inventory items or assembly items, with attributes such as color and size. Also provides the ability to create custom grid print templates and assign them to transactions. See the help topic Grid Order Management	See Setting Up the Grid Order Management SuiteApp .
International Tax Reports	43003	Supports VAT and GST reporting and online filing for more than 42 countries across Europe, Asia, and Latin America, all generated in the local format for ease and accuracy of submission. Includes EU Sales List reports, Intrastat reports, sales and purchase reports by tax code, and pre-configured tax codes when a new nexus is created. See the help topic International Tax Reports .	See the help topic Installing and Setting Up International Tax Reports .

Name	ID	Description	How to Install the SuiteApp
Japan Localization	82168	Provides Japan-specific features including localized NetSuite components, Japanese billing cycle and payment terms, customizable Japanese Item Detail Statement, and deductible purchase tax calculation. See the help topic Japan Localization Features .	See the help topic Installing the Japan Localization SuiteApp . This SuiteApp is automatically installed in newly provisioned NetSuite Japan edition accounts.
Last Sales Activity	16140	Allows you to view the date and record of the last sales activity performed on a lead, prospect, customer, contact, or opportunity records, and supports the addition of related dashboard metrics. See the help topic Last Sales Activity .	See the help topic Setting Up the Last Sales Activity SuiteApp . This SuiteApp is automatically installed in newly provisioned NetSuite accounts, except NetSuite Japan edition.
Mexico Compliance	131375	Provides custom fields, validations, and other customizations for Mexican businesses to comply with tax and other government requirements in Mexico. See the help topic Mexico Compliance Features .	See the help topic Installing SuiteApps for Mexico .
Navigation Portlet	186103	Enables users to create navigation categories and shortcut groups to simplify their navigation to commonly used menus in NetSuite. See the help topic Navigation Portlet .	See the help topic Installing the Navigation Portlet SuiteApp .
NetSuite Approvals Workflow	16707	Validates transactions against predefined exception criteria using workflows. Includes the following: <ul style="list-style-type: none"> 3 Way Match Vendor Bill Approval Workflow Vendor Bill Approval Workflow Invoice Approval Workflow 	See the help topic Installing the NetSuite Approvals Workflow SuiteApp .
NetSuite for Outlook	26153	A Windows-based application that allows you to save email messages from Outlook into NetSuite and to synchronize your events, tasks, phone calls, and contacts. This SuiteApp must be installed in your account so your customers can use NetSuite for Outlook. After installing this SuiteApp, each user can install and use the NetSuite for Outlook client. See the help topic NetSuite for Outlook .	See the help topic NetSuite for Outlook .
NetSuite SuiteApps License Client	116144	Controls access to features of certain SuiteApps depending on whether the account has an active license for the SuiteApp. See the help topic NetSuite SuiteApps License Client	See the help topic Installing the NetSuite SuiteApps License Client .
Oracle NetSuite PBCS Sync	168463	Enables you to extract accounting reports from NetSuite saved searches, and use the accounting reports in Oracle Planning and Budgeting Cloud Service. See the help topic Oracle NetSuite PBCS Sync .	See the help topic Installing the Oracle NetSuite PBCS Sync SuiteApp .
Payment Gateway	47196	Enables integration with various regional payment gateways to provide international credit card processing and merchant services. See the help topic Payment Gateway .	See the help topic Setting Up Regional Payment Gateways . This SuiteApp is automatically installed in some SuiteApp accounts.

Name	ID	Description	How to Install the SuiteApp
Portugal Invoice Certification	33315	Meets the software certification requirements in Portugal for computer generated invoices, as mandated by Portuguese Decree n° 363/2010 of the 23rd June Series I n° 120, and by Circular Letter N°: 50 000/2012. See the help topic Portugal Tax Topics .	See the help topic Portugal Tax Topics .
Printing Option for Journals	8792	Allows you to print journals for selected periods. Intended for a single company. See the help topic Printing Journal Entries .	See the help topic Printing Journal Entries .
Product Merchandising	32027	Allows you to define and display merchandising zones on your SuiteCommerce web store. Merchandising zones display complementary, cross-sell or up-sell products. See the help topic Product Merchandising	See the help topic Product Merchandising .
Project Task Manager (formerly NetSuite Resource Manager)	48331	Provides a graphic interface that displays all project resources and tasks in one place, with tools to help you manage project resources. See the help topic Project Task Manager .	See the help topic Project Task Manager .
Purchase Order Approval Workflow	18851	Provides a built-in purchase order approval routing process that you can modify for the specific needs of your business. See the help topic Purchase Order Approval Workflow .	See the help topic Setting Up the Purchase Order Approval Workflow .
Quality Management	211177	The NetSuite Quality SuiteApp is a critical part of any manufacturing operation. It provides templates and tools to help organizations maintain and associate quality data to other business records and workflows. To learn more, see the help topic Quality Management .	See the help topic Quality Setup and Maintenance .
Recurring Billing	154400	Manages your business' pricing and rating strategy and automates your company's billing and invoicing process. See Recurring Billing Guide .	See Recurring Billing Guide .
Recruiting Reports	167235	Provides job requisition reports that are available as NetSuite saved searches. When customized, the saved searches can be accessed from a unique Reports menu location.	See the help topic Recruiting Reports .
Resource Allocation Chart	38321	Enables you to edit existing allocations and create new allocations while visually managing employee utilization in a single chart. Resource Allocations feature is required. See the help topic Resource Allocation Chart/ Grid SuiteApp .	See the help topic Resource Allocation Chart/Grid .
Resource Skill Sets	36477	Enables you to set skills and abilities on employee records, and then search and assign project resources based on required skill sets. See the help topic Resource Skill Sets .	See the help topic Resource Skill Sets .
Resource Allocations Custom Approval Workflow	42036	Enables you to use SuiteFlow to implement an approval routing process for resource allocations. Resource Allocations and SuiteFlow features are required. See the help topic Resource Allocations Custom Approval Workflow .	See the help topic Resource Allocations Custom Approval Workflow .

Name	ID	Description	How to Install the SuiteApp
Script Performance Monitor	38106	 Warning: As of May 2015, the Script Performance Monitor is not available for new installations. If you have already installed this SuiteApp, it should continue to work normally, but you can no longer install it. The Script Performance Monitor has been deprecated by the Application Performance Management (Beta) SuiteApp. This new SuiteApp includes performance data provided by the Script Performance Monitor, as well as additional performance metrics. For information about the Application Performance Management (Beta) SuiteApp, see the help topic Application Performance Management (APM) .	See <i>Using the Script Performance Monitor</i> .
Script Queue Monitor (Beta)	56125	Provides visualizations of script queue usage for accounts with one or SuiteCloud Plus licenses. See the help topic SuiteScript Monitoring with the Script Queue Monitor .	See the help topic Script Queue Monitor Installation and Access .
StickyNotes (Beta)	49018	Lets you attach private or public notes on record pages and on specific fields on a form, and share them with your colleagues. See the help topic Creating StickyNotes on Record Pages .	See the help topic Installing StickyNotes .
Subsidiary Navigator (Beta)	44281	Enables you to limit the information displayed on your dashboard, searches, and reports to a specific subsidiary or group of subsidiaries. See the help topic Working with Subsidiary Navigator .	See the help topic Installing Subsidiary Navigator .
SuiteApprovals for Journal Entry	203059	Provides standard capabilities for managing journal entry approval. With the customizable properties of SuiteApprovals, you can ensure that only authorized individuals can edit, approve, reject, and resubmit journal entries for approval. You can create approval rules, each consisting of a set of criteria and approval hierarchy, to manage the validation and approval routing of journal entries.	See the help topic Installing SuiteApprovals for Journal Entry .
SuiteCommerce Advanced	194217	With SuiteCommerce Advanced, you have all of the functionality of an SuiteCommerce Standard implementation but also have complete control for advanced customization beyond what can be done with themes and extensions. See <i>SuiteCommerce Advanced</i>	See the help topic Overview .
SuiteCommerce Configuration	135010	Enables the SuiteCommerce Configuration record in NetSuite and lets you configure your SuiteCommerce site.	See the help topic Install Your SuiteCommerce Application .
SuiteCommerce Standard	165413	Provides a flexible, incredibly fast and open front-end solution enabling richly branded, highly personalized and engaging shopping experiences that will drive conversion and grow	See the help topic Overview .

Name	ID	Description	How to Install the SuiteApp
		your business. Includes Shopping, Checkout, and My Account experiences.	
SuiteSocial	58414	Enables you to more tightly connect social interactions to your NetSuite data and track important changes to that data. You can see updates posted by your colleagues, and real-time posts when relevant NetSuite records are created or edited. See the help topic SuiteSocial .	See the help topic Setting Up SuiteSocial .
SuiteSocial Yammer Integration	31163	Integrates SuiteSocial with Yammer for enhanced social collaboration. Posts automatically generated by SuiteSocial are posted on the Yammer Activity Stream. See the help topic SuiteSocial-Yammer Integration .	See the help topic Installing the SuiteSocial-Yammer Integration SuiteApp .
Supplementary Tax Calculation	123426	Enables you to manage nondeductible input taxes on vendor bills, expense reports, checks, and vendor bill credits in NetSuite. See the help topic Recording Nondeductible Input Tax .	See the help topic Setting Up Nondeductible Input Tax .
Supply Chain Management	47193	Provides consolidated, real-time data for various supply chain processes to make information accessible across subsidiaries. You can also print an Inventory Count Sheet, Manufacturing Dispatch List, and Manufacturing Traveler. Includes the following: <ul style="list-style-type: none"> ■ Manufacturing Task Scheduler ■ Estimated Landed Cost ■ Customer Part Number See the help topic Supply Chain Management Reports	See the help topic Installing Supply Chain Management .
SWV Contract Renewals Module	53236	Manages recurring billing of both on-premise and on-demand software licenses and entitlements for software companies. See the help topic Software Vertical Contract Renewals .	See the help topic Installing the Contract Renewals SuiteApp .
Tax Audit Files	47492	Generates extracts of general ledger and sub ledger data from NetSuite, to be used by tax authorities to audit transaction data. Includes Singapore IAF, Mexico DIOT, OECD SAF-T, Portugal SAF-T PT, and Philippine RR09-2009 audit files. See the help topic Tax Audit Files .	See the help topic Installing and Setting Up Tax Audit Files .
Time-Off Tracking	112449	Enables employees to submit time-off requests within their Employee Center role and provides a single-stage approval workflow that routes requests to the employee's supervisor.	See the help topic Installing the Time-Off Tracking SuiteApp .
Transaction Locking	8791	Prevents users in companies or subsidiaries in Austria, Brazil, Czech Republic, Denmark, Germany, Israel, Sweden, and Switzerland, from editing and deleting transactions, in compliance with accounting regulations in those countries. See the help topic Locking Transactions by Subsidiary .	See the help topic Locking Transactions by Subsidiary .

Name	ID	Description	How to Install the SuiteApp
TribeHR Payroll Integration	70260	Enables automatic synching of time-off transactions from TribeHR to NetSuite payroll. See the help topic TribeHR Payroll Integration .	See the help topic Installing the TribeHR Payroll Integration
NetSuite Records Timeline (Beta)	40073	Provides a visual representation of related records when viewing record pages in NetSuite. See the help topic Working with NetSuite Records Timeline (Beta) .	See the help topic Installing NetSuite Records Timeline .
Warranty and Repairs Management	51007	Offers a highly convenient way for companies to register product warranties and to process warranty claims. See the help topic Warranty and Repairs Management .	See the help topic Installing Warranty and Repairs Management .
Withholding Tax	21144	Tracks withholding tax on sales and purchase transactions, and records it on the general ledger either at the time of accrual or at the time of payment, depending on the country's taxation rules. Provides summary and detailed withholding tax reports. See the help topic Withholding Tax .	See the help topic Setting Up Withholding Tax .

Third Party SuiteApps (not provided by Oracle)

Third party SuiteApps are developed and supported by SuiteCloud Developer Network (SDN) partners and other third parties. They are built on the platform and bundled using SuiteBundler, similar to NetSuite SuiteApps.

The following are examples of third party SuiteApps:

- Box for NetSuite
- Celigo Integrator
- SPS Integration

For information about SuiteApps developed and supported by SDN Partners and other third parties, see [SuiteApp.com](#). On [SuiteApp.com](#), you can search third party SuiteApps by industry, business need, or keyword. In addition, you can read customer reviews, try out solutions, and find out where to buy these SuiteApps.

Updating SuiteApps

Most SuiteApps are automatically updated by NetSuite in accounts whenever there are changes. Issue fixes and enhancements are available after the SuiteApp is updated in your account.

Some NetSuite SuiteApps do not have automatic updates. These SuiteApps enable you to choose when you want to implement an update. These NetSuite SuiteApps are:

- Reference Checkout
- Reference My Account
- Reference My Account Premium
- Reference Shopflow
- Content Delivery Service

- Product Merchandising

See the help topic [Installed Bundle Updates](#) for instructions for updating an installed bundle.

Displaying SuiteApps on Your Dashboard

Some of the SuiteApps installed in your account can also be used as dashboard portlets.

To be used as a dashboard portlet, a SuiteApp must include a dashboard component.

To learn how to add a SuiteApp portlet to your dashboard, see the help topic [SuiteApp Portlets](#).

 **Note:** SuiteApp portlets cannot be added to custom dashboards.
